ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite):

The drainage swale was constructed next to the runway to carry surface runoff. The swale is not a 3-parameter wetland because it lacks hydric soils, OHWM, and indicators of wetland hydrology. In addition, the wetland has concrete outlets at each end. Both wetlands appear to be isolated. The smaller one had a drainage tile leading out; according to the consultant, this tile leads to the County drainage network and is therefore within our jurisdiction. The larger wetland has no discernable outlet and is isolated. Neither wetland has any nexus to interstate commerce other than being located on airport property.

TALLY Of Wetland Acreage:

Jurisdictional Waters: 0.02 acres

Isolated Waters not under COE Jurisdiction:

Wetland 1: 0.6 acres

Total: 0.60 acres isolated per the SWANCC Supreme Court Decision
